

What's **NEW**@ **AEM**[®] COMPONENTS

Circuit protection for automotive, industrial, & commercial applications

SolidMatrix[®] Fuses

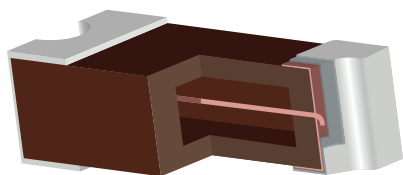

Features

- Robust co-fired monolithic construction
- Best-in-class volumetric efficiency
- Excellent inrush current withstanding capability

AirMatrix[®] Fuses

AEC-Q200 Qualified

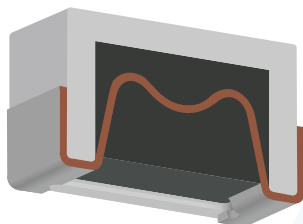

Features

- Robust solderless construction
- Best-in-class volumetric efficiency
- Superior performance in extremely harsh conditions

CMF High Power Fuses

AEC-Q200 Qualified

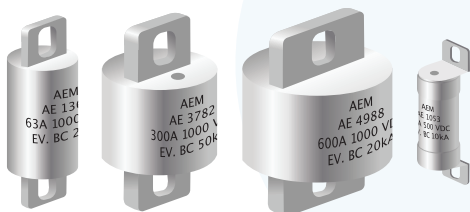

Features

- 2822 package size for 20A to 125A (150A & 200A available)
- Best in Class ESR & Power Density with Current Ratings up to 200A
- Outstanding arc suppression characteristics

EV Fuses

AEC-Q200 Qualified

Features

- High current – High voltage designs up to 600A & 1kVdc
- Compact bolt-in designs
- Superior arc suppression characteristics
